Content Without the Daily Panic

Read this first

The gap between creators who post consistently and creators who don't usually isn't talent or ideas — it's a system. This calendar removes the "what do I even post today" decision by rotating through six content types across the month, so you always know what kind of post is due, and just need to fill it with your specific content.

The Six Content Types in Rotation

- ☐ Educational — teach something your audience wants to know
- ☐ Relatable/Storytime — a moment that makes you human
- ☐ Behind-the-Scenes — process, not just polished results
- ☐ Engagement — a question or prompt that invites comments
- ☐ Promotional — your offer, product, or service, directly
- ☐ Trend/Entertainment — culture-relevant, lighter content

Batching & Repurposing

The system behind the system

Batch One Day a Week

Pick one day to film or write 3-4 pieces of content at once, using this calendar as your outline. Batching removes the daily "am I on brand right now" pressure.

Repurpose Your Best Posts

Track which post each week performed best. At the end of the month, that's your shortlist for what to repurpose into a different format next month — a carousel becomes a video, a story becomes a full post.

CALENDAR FILLED
