

CREATOR MUSE AI

The Creator Muse AI Prompt Pack

Ready-to-paste AI prompts for the parts of content creation that usually eat the most time: ideas, brand voice, and knowing what's actually working.

"Let AI handle the blank page. You handle the personality."

CREATOR MUSE AI

WELCOME

How to Use This Pack

Read this first

These prompts pair with any AI chat tool. Copy them as-is, swap the brackets for your details, and use the output as a first draft — not a finished post. Your voice, your specifics, and your actual experience are what make content land; AI is fastest at getting you unstuck and organizing your thinking.

Content Ideation

For when you have no idea what to post

"My content niche is [niche] and my audience is [who they are]. Give me 15 content ideas across educational, relatable, and behind-the-scenes categories that I haven't covered yet: [list recent topics you've covered]."

"Here's a topic I keep coming back to: [topic]. Help me find 5 different angles on this same topic so it doesn't feel repetitive to my audience."

"What are 5 questions my ideal audience ([describe them]) is probably asking right now related to [niche]? Write them exactly as they'd type them."

Finding & Defining Your Brand Voice

So every piece of content sounds like you, even written fast

"Here are 3 captions I've written that felt the most 'me': [paste them]. Analyze the tone, sentence length, and word choices, and describe my natural voice back to me in a few sentences."

"Rewrite this caption in my voice, based on this description: [paste voice description from above]. Original caption: [paste generic caption]."

Your Voice, In Your Own Words

Turning Analytics Into Decisions

For the confusing part most creators skip

"Here's how my last 10 posts performed: [paste views/engagement numbers and topics]. Help me spot a pattern in what's actually resonating versus what I assumed would."

"My [specific post] did much better than usual. Here's what it was about: [describe it]. Help me brainstorm 5 follow-up posts that build on whatever made this one work."

Handling Comments & DMs at Scale

Staying responsive without it consuming your whole day

"Here are a few common comments/questions I get: [list them]. Help me draft warm, non-copy-paste-sounding responses I can adapt quickly for each."

"Someone left a critical or negative comment: [paste it]. Help me figure out if there's a real point worth addressing, and draft a response that's calm and not defensive."

Content Batching & Planning

For your weekly or monthly planning session

"Using the 30-Day Content Calendar rotation (educational, relatable, behind-the-scenes, engagement, promotional, trend), help me fill in specific topics for next week based on what's going on in my [niche/business] right now: [share context]."

"I have one hour to batch content today. Here's my content calendar for the week: [paste it]. Help me group these into the fewest possible filming/writing sessions."

THE FULL SYSTEM

You Have a Content System Now, Not Just a Posting Habit

Calendar, hooks, captions, scripts, and AI support —
every part of "what do I post" is covered.
