

MONEY MUSE AI

The Money Reset Workbook

A sophisticated, shame-free reset for your relationship
with money — not another guilt-trip budgeting
spreadsheet.

*"You can't budget your way out of a belief you haven't
looked at yet."*

MONEY MUSE AI

A Different Kind of Money Workbook

Read this first

Most money content starts with a spreadsheet. This one starts with your actual relationship to money — because a perfect budget built on top of shame, avoidance, or old scarcity beliefs rarely survives past week two. The Money Reset works through four stages: facing where things actually stand, understanding the beliefs running your decisions, resetting your daily and monthly systems, and building a forward plan you can trust yourself to follow.

By the end, you'll have:

- ☐ A full, honest picture of your current financial reality
- ☐ Clarity on the money beliefs quietly shaping your decisions
- ☐ A simple system for checking in with your money weekly, without dread
- ☐ A written 90-day money plan built on facts, not anxiety

The Honest Financial Snapshot

You can't reset what you haven't looked at

Category	Amount
Monthly income (take-home)	
Total monthly essential expenses	
Total monthly debt payments	
Current savings balance	
Total debt balance	

The Feeling Check

Before you looked at these numbers, what did you expect to feel? What did you actually feel? That gap is worth noticing.

.....

Your Money Story

The beliefs running quietly underneath your decisions

Where You Learned About Money

What did money look like growing up — scarce, tense, never discussed, tied to worth? Whose voice do you hear when you think about spending or saving?

.....

.....

Belief about money	Where it came from	Still true?

AI companion prompt: "Here's a belief I hold about money: [belief], which I think came from [where it started]. Help me examine whether this belief still serves the life I'm trying to build, and suggest a more accurate replacement."

Resetting Your Systems

Small, repeatable checkpoints beat willpower

The Weekly Money Date

Pick a consistent day and time, 15 minutes, to check your accounts, review upcoming bills, and glance at your goals. Treat it like a standing appointment with yourself, not a punishment.

Day/time	What you'll check
	Balances, upcoming bills, one goal update

The Monthly Reset

Once a month: review last month's actual spending against plan, adjust categories that were unrealistic, and set one focus for the coming month.

Your 90-Day Money Plan

Turning the reset into real progress

Priority	Target by Day 90	First action
1.		
2.		
3.		

The One Constraint

What's most likely to derail this plan — an irregular income, a specific expense, an old habit? Name your workaround now, while you're thinking clearly.

.....

When Old Patterns Creep Back

A reset isn't permanent immunity — it's a system you return to

Signal	What to try
You've skipped your weekly money date twice	Shrink it to 5 minutes instead of skipping entirely
You're avoiding checking your balance	That avoidance is information — name what you're afraid you'll see
An old scarcity belief resurfaced	Revisit Stage 2 — beliefs often need more than one pass

Quarterly Check-In

Every 90 days, redo your financial snapshot from Stage 1 and compare. Progress in this area is rarely dramatic week to week — it's visible quarter to quarter.

RESET COMPLETE

Your Relationship With Money Just Changed

Not because the numbers are perfect yet — because
you're looking at them now instead of avoiding them.
